Acceptance Criteria & Acceptance Tests

User Story ID	Acceptance Criteria	Acceptance Tests
1.1	- There should be a "Create New Class" button on the Admin dashboard. - Clicking the button should open a form asking for class details (Name, Description, Duration, Maximum capacity, etc.) - The form should have validation for required fields. - On form submission, the new class should be added to the system and should appear in the list of classes.	1. Navigate to "Create New Class" from the Admin dashboard. 2. Fill out the required fields and click "Submit." 3. Confirm that the new class appears in the list of classes. 4. Verify that it's possible to enroll students or coaches into this class.

1.2	- There should be a "View Classes" option on the Admin dashboard. - Clicking the option should display a list of all classes with options to preview each class. - The preview should show class name, duration, description, and any associated materials.	1. Click on "View All Classes" from the Admin dashboard. 2. Verify that all classes are listed. 3. Click "Preview" on one of the classes. 4. Confirm that all details, including enrolled students and coaches, are displayed correctly.
1.3	- The list of classes should have an "Edit" button next to each class. - Clicking "Edit" should open a form pre-filled with existing class information. - Upon updating the form and submitting, the updated details should reflect immediately in the system.	1. Navigate to the class list. 2. Click "Edit" on an existing class. 3. Change some details and save. 4. Confirm that the changes are reflected in the class list and in the class details.
1.4	- Each class in the list should have a "Delete" button. - Clicking "Delete" should show a confirmation prompt. - After confirming, the class should be removed from the system.	1. Navigate to the class list. 2. Click "Delete" on an outdated class. 3. Confirm the deletion in the prompted dialog. 4. Verify that the class no longer appears in the class list.
2.1	- Under each class, there should be an option to add a new module. - Clicking this should open a form asking for module details like Name, Description, and associated class. - On form submission, the new module should be added under the selected class.	1. Select a class and click "Add Module." 2. Fill out all necessary information and click "Create." 3. Verify that the new module appears under the correct class. 4. Confirm that it's possible to add materials to the module.
2.2	- There should be a "View Modules" option on the Admin dashboard. - This should list all modules with options to preview each one. - The preview should show module name, description, and any associated materials.	1. Click on "View All Modules" from the Admin dashboard. 2. Verify that all modules are listed. 3. Click "Preview" on one of the modules. 4. Confirm that all details, including associated classes and materials, are displayed correctly.
2.3	- Each module in the list should have an "Edit" button. - Clicking "Edit" should open a form pre-filled with the existing module information. • On form submission, the updates should be reflected immediately in the system.	1. Navigate to the module list. 2. Click "Edit" on an existing module. 3. Change some details and save. 4. Confirm that the changes are reflected in the module list and in the module details.
2.4	- Each module should have a "Delete" button. - Clicking "Delete" should show a confirmation prompt. - After confirming, the module should be removed	1. Navigate to the module list. 2. Click "Delete" on an outdated module. 3. Confirm the deletion in the prompted dialog. 4. Verify that the module no longer appears in the module list.
3.1	- Each module should have an "Upload Materials" button. - Clicking it should allow the uploading of various file types. - Once uploaded, the materials should be accessible from the module.	1. Navigate to a module and click "Upload Materials." 2. Choose a file and click "Upload." 3. Confirm that the file is listed under the module's materials. 4. Preview the uploaded material to confirm it's accessible.
3.2	- There should be a "Share" button next to each uploaded material. - Clicking it should open a dialog allowing the admin to select which coaches or groups to share the material with	1. Navigate to "Training Materials" and select one. 2. Click "Share" and choose either individual coaches or groups. 3. Confirm the material is accessible to those with whom it was shared.

3.3	- There should be a "View Materials" option on the Admin dashboard. - Clicking this should list all uploaded materials with options to preview each one. - The preview should include file type, size, and a quick-view option.	1. Click "View All Training Materials" on the Admin dashboard. 2. Verify that all uploaded materials are listed. 3. Click "Preview" on one of the materials. 4. Confirm that all details, including file type and size, are displayed correctly.
3.4	- Each material in the list should have an "Edit" button. - Clicking "Edit" should open a form allowing updates to material metadata like name or description. - Updated details should reflect immediately in the system.	1. Navigate to the training materials list. 2. Click "Edit" on one of the materials. 3. Change some details and save. 4. Confirm that the changes are reflected in the materials list and the material details.
3.5	- Each material in the list should have a "Delete" button. - Clicking "Delete" should prompt a confirmation dialog. - Upon confirmation, the material should be removed from the system.	1. Navigate to the training materials list. 2. Click "Delete" on an irrelevant material. 3. Confirm the deletion in the prompted dialog. 4. Verify that the material no longer appears in the list.
4.1	- There should be a "Manage Coaches" section in the Admin dashboard. - Within this, there should be an option to "Create New Coach." - This should open a form to input coach information and generate login credentials. - Credentials should be securely stored and optionally sent via email to the coach.	1. Navigate to "Manage Coaches." 2. Click "Create New Coach." 3. Fill out the required fields and click "Create." 4. Confirm that the new coach receives an email with login credentials.
4.2	- In the "Manage Coaches" section, there should be an option to "Revoke Access" next to each coach. - Clicking this should disable the coach's login credentials and remove their access to materials.	1. Navigate to "Manage Coaches." 2. Click "Revoke Access" next to a coach's name. 3. Confirm the action. 4. Verify that the coach's credentials are deactivated.
4.3	- In the "Manage Coaches" section, there should be an option to "Edit Permissions" next to each coach. - This should open a form with options to assign or modify permission levels based on coaching needs.	1. Navigate to "Manage Coaches." 2. Click "Edit Permissions" next to a coach's name. 3. Modify the permissions and save. 4. Verify that the changes are reflected in the system.
4.4	- The login page should be secured with HTTPS and require a username and a strong password. - After a successful login, the user should be directed to the Admin dashboard. - There should be an option to logout, which when clicked should terminate the session and redirect the user to the login page.	1. Log out from the Admin dashboard. 2. Try logging in with incorrect credentials and verify that access is denied. 3. Log in with correct credentials and verify that you are redirected to the Admin dashboard. 4. Log out and confirm that you are redirected to the login page.
5.1	- The Admin dashboard should be easy to navigate, with clearly labeled sections. - There should be a navigation menu for quick access to different functionalities.	1. Log into the Admin dashboard. 2. Verify that the UI layout is intuitive and easy to navigate. 3. Confirm that all features are accessible within 3 clicks from the dashboard.
5.2	- There should be a search bar at the top of the Admin dashboard. - The search should auto-suggest and support filtering by classes, modules, and materials.	1. Use the search bar on the Admin dashboard. 2. Type in a keyword related to a class, module, or material. 3. Verify that the search results are accurate and relevant.

5.3	- There should be a "Profile" section where personal information can be viewed and edited. - Changes should be saved immediately upon confirmation.	1. Navigate to "Profile." 2. Change some details and click "Save." 3. Verify that the changes are reflected immediately.
6.1	- Under each module, there should be an option to "Create New Assessment." - This should open a form to design assessments, specifying questions, answer options, and scoring criteria. - Once created, the assessment should be accessible under the relevant module for coaches to use.	1. Navigate to a specific module. 2. Click "Create New Assessment." 3. Design the assessment and click "Save." 4. Confirm that the assessment is listed under the module and is accessible to coaches.
6.2	- There should be a "View Assessments" option on the Admin dashboard. - Clicking this should list all created assessments with options to preview each one. - Preview should include the questions, options, scoring criteria, and associated modules/classes.	1. Click "View All Assessments" on the Admin dashboard. 2. Verify that all assessments are listed. 3. Click "Preview" on one of the assessments. 4. Confirm that all details are displayed correctly.
6.3	- Next to each assessment in the list, there should be an "Edit" button. - Clicking "Edit" should open a form pre-filled with the existing assessment details. - Upon updating and submitting the form, changes should reflect immediately in the system.	1. Navigate to the assessment list. 2. Click "Edit" on an existing assessment. 3. Modify some details and click "Save." 4. Verify that the changes are accurately reflected in the list and the assessment details.
6.4	- Each assessment in the list should have a "Delete" button. - Clicking "Delete" should trigger a confirmation prompt. - On confirmation, the assessment should be permanently deleted from the system.	1. Navigate to the assessment list. 2. Click "Delete" on an outdated assessment. 3. Confirm the deletion in the prompted dialog. 4. Verify that the assessment no longer appears in the list.
